EDUCATION

King's College London, BSc Computer Science with Management — Expected Jun 2028
After King's International Foundation Programme (CS & Maths), 2023–24, A grade — *London, UK*
Relevant coursework: Data Structures, Databases, Operating Systems & Concurrency, Software Engineering Group Project

University of California, San Diego, Computer Science (Exchange Year) — 2026 – 2027

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, HTML/CSS, C, C++, Scala
Frameworks: React, Next.js, Node.js, Django, Django REST Framework, Django Channels, Tailwind CSS, JavaFX
Data & Infrastructure: PostgreSQL, Prisma, Supabase, pandas, Docker, Vercel, Git, GitHub Actions, REST APIs
Testing & AI: Vitest, React Testing Library, LLM APIs (Claude, Groq)
Spoken Languages: English (Native), Arabic (Native), Mandarin (Beginner), French (Beginner)

EXPERIENCE

Co-Founder & Chief Technology Officer — Mar 2026 – Present
KBT Fit Intelligence Platform · *fit.kbtcloset.com/hajruss* — *London, UK*

- Lead product and engineering for a live fashion-tech platform that lets brands add a "Check My Fit" button to product pages, turning a shopper's body scan into a per-product size verdict.
- Built the fit-verdict engine and platform API end-to-end (Next.js, TypeScript, PostgreSQL, Prisma) on the Bodygram SDK.
- Defined product requirements and brand-integration flows, and shipped the first live integration with launch partner Hajruss, coordinating directly with their team.

Software Engineering Intern — Jul 2026 – Aug 2026
Fiddlie, Product & Innovation Studio — *London, UK*

- Sole developer of a role-separated client and studio portal (Next.js, TypeScript, Supabase), with access enforced by Postgres row-level security.
- Built proposal-to-project extraction from PDFs or pasted text, and a drag-and-drop timeline editor with undo and autosave.
- Added versioned files, annotation pins on images and PDFs, and one-click handover; built in six weeks, demoed to the full team, and launching with clients in early 2027.

Consulting Intern — Aug 2023
Pure Group Consulting — *Riyadh, Saudi Arabia*

- Benchmarked local destination management companies (DMCs) against international competitors across Europe and the Gulf.
- Contributed to a Saudi Tourism Authority project identifying gaps in the national tourism ecosystem.
- Analyzed competitor business models and market positioning to inform strategic recommendations.

PROJECTS

Interactive Classroom Polling Platform — 2026
React, Django Channels (WebSockets), PostgreSQL, Docker

- Teachers run live sessions; students join by room code or QR code and answer in real time.
- Built the live question display and response counter, live statistics for teachers and students, and the points and leaderboard system.
- Added ordering-question support to live sessions and wrote backend and frontend tests for responses, scoring and live-poll flows.

London Air Pollution Visualization System — 2025
JavaFX

- Built a JavaFX app mapping air pollution across 30+ London boroughs with heat maps and time-series graphs.
- Added regional comparison tools with dynamic filtering across boroughs.

Recipe Discovery Platform — 2025
Python, Django

- Built the homepage search, filter dropdown and most-popular section, plus sort by cook time and filter by difficulty.
- Added favoriting, saved-recipe dashboards and a featured carousel, and redesigned the frontend.

LEADERSHIP

Computer Science BSc Student Representative — Oct 2023 – Present
King's College London — *London, UK*

- Represent the cohort to faculty, raising academic concerns, course issues and improvement proposals.
- Work with staff and peers to improve course delivery, assessment processes and the student experience.
